LEONARD ARBORRAIN™ TOWER, PLANT AND TREE HYDRATOR

The latest addition, the ArborRain™ Tower, represents a design recognized by the industry. Its tall, slim shape, 18" wide when filled, works well in the landscape and nursery, and can also be used to irrigate smaller diameter B&B and containerized trees. Single fits up to 4" diameter. Zip two together to irrigate up to 8" trees.

GroundsGuys \$19.78

MELNOR SUNRISE ONCE-A-DAY WATER TIMER

The Melnor Sunrise™; Timer uses a photo sensor to detect when the sun rises and automatically turns on watering within 30 minutes. The duration of the can easily be set from 5 to 120 minutes based on your garden's needs. Just turn the timer's dial to your preferred time. The manual function lets you use your faucet for other tasks. Simply turn the dial to "On" when you need to wash your car, spray off the deck, or manually use the garden hose. Requires two AA batteries (not included). The manufacturer backs this timer with a 7-year limited warranty.

13012 \$31.24 GroundsGuys \$23.48

LEONARD TOWER SPRINKLER, STAND ONLY

Adjustable height from 48" to 72", the orange powder coated frame has a zinc plated height lever and leg fasteners. Angled feet provide stability and includes 1/2" holes for staking if desired. Brass adapters included for 1/2" and 3/4" male NPT sprinkler heads. Standard garden hose connection. This sprinkler stand is a real workhorse! **Sprinkler heads sold separately.**

5/8" PROFESSIONAL SOAKER HOSE

A great all-around hose. It has 5/8" outside diameter and 1/2" inside diameter. This hose works for individual runs up to 200'. The double thick side wall allows more even water distribution: 50' has nickel-plated hose ends. The Pro Series is kink and crush resistant and will not freeze. We recommend that you either cover the hose with mulch or bury it up to 6" deep for longest life. End cap included.

GW50 50' **\$30.66** GroundsGuys **\$24.56**

1" PROFESSIONAL SOAKER HOSE

Professional grade soaker hose with a 1" outside diameter and a 0.21" wall thickness. Thicker walls for better performance while running at longer lengths. Great for watering large areas more evenly. Typically irrigates 16" wide strip, depending on soil type. Get even coverage while running several hundred feet continuously. Brass fittings and end cap included.

OS250 250' **\$185.33** GroundsGuys **\$147.95**

LEONARD LAY FLAT SUPPLY HOSE

After years of research, AML is proud to present it's own 1" Lay Flat Hose with standard 3/4" Garden Hose Thread couplers. Engineered like hoses that endure the rigors of wildland fire fighting providing the ultimate in heat, abrasion and puncture resistance. Designed as a supply hose for larger sprinklers or filling tanks, or the discharge side of pumps, etc., this hose moves a lot of water fast. Easy to roll up and store, lightweight for easy transportation.

MAXIJET IRRIGATION AG STAKE

For today's high density plantings, the MAX-14 fill-in jet delivers a uniform filled-in pattern with maximum efficiency. Durable one-piece jet with a winged one-arm design and quick locking threads to get the jet in and out of the stake in 1-2 turns. Jets can be turned upside down to reduce the diameter of the spray pattern for young trees' smaller root zones. 12 ft diameter spray pattern at 20-30 psi, 12 gph. 13" stake with 36" blue flexible vinyl supply tube with barb.

MAX36 **\$3.05** GroundsGuys **\$2.32**

MAXIJET IRRIGATION NURSERY STAKE B&B ASSEMBLY, 28IN DIAMETER SPRAY MAX

Unique double down spray pattern produces an inner and outer 360 degree circle for a total spraying diameter up to 28" and is the only spray jet pattern designed to work at flows as low as 1-2gph. Complete with 12" stainless steel rod, and 36" blue flexible vinyl supply tube with barb. New shut-off hole to crimp vinyl tube and shut off water to jet. Extra rod post to add additional support rod. Flexible thick walled vinyl tubing w/ UV inhibitors and fungicide.

NCR36 **\$2.81**
 GroundsGuys **\$2.14**

CONTAINERIZED STOCK ASSEMBLY

A quick and easy way to water! 160° fan spray for 1-15 gallon containers. Works well from low pressures of 2-3 psi (3.7 to 4.5 gph) up to 20-35 psi (10.5 gph to 13 gph). 5-1/4" stake has steep angle threads to easily lock in tubing. Shut off side arm with ring and steps to hold it in soil. 36" blue flexible vinyl supply tube and barb by barb adapter. NOTE: if you are operating at over 35 psi, we suggest using the pressure compensating control adapter sold separately (MJTB). **Sold in bundles of 25.**
