

By Environmental Biotech

Remove all germs, viruses and smells instantly!

Especially designed for hospital and institutional use.

HOMES HOSPITALS HOTELS BATHROOMS PET ROOMS CARE HOMES AND MORE...

Disinfecting a room is easier than ever before...

B SANITIZED – Disinfectant Fogger / Deodorizer

Virucidal - Tuberculocidal - Fungicidal - Bacteriocidal - Pseudomonicidal - Staphylocidal

Imagine how long it would take to fully disinfect every single surface in a room. With B SANITIZED, you can do this in just minutes!

B SANITIZED is an EPA registered disinfectant in a full release fogger that contains a broad-spectrum antimicrobial agent for all surfaces. B SANITIZED also contains a patented odor counteractant for effective and immediate odor control!

B SANITIZED is effective against HIV, TB, Herpes Simplex II, Influenza viruses, *Staphylococcus aureus*, *Salmonella enterica*, and Athletes foot fungi. It controls mold and mildew by destroying them at their source!

When placed in the center of a room B SANITIZED will effectively disinfect all surfaces, allowing the entire area to be fully disinfected and germ-free. Alternatively, B SANITIZED can also be used as an aerosol spray directly on environmental surfaces.

B SANITIZED is great for schools, hospitals, daycares, kennels, care homes, cars, buses, taxis, boats, homes, offices, kitchens, bathrooms and anywhere else germs exist!

- Bacteriocidal - Kills *Escherichia coli*, *Pseudomonas aeruginosa*, *Salmonella enterica*, Methicillin-resistant *Staphylococcus aureus* (MRSA) and more.
- Virucidal against HIV-1 (AIDS virus), Herpes Simplex 1 and 2, Avian Influenza A virus (H5N1), Pandemic 2009 H1N1 Influenza A Virus and more.
- Sanitizes fabric and leather, shoes, athletic mats and equipment.
- Controls microorganisms that create foul, putrid odors.

FEATURES, CLAIMS, AND USES

B SANITIZED has demonstrated effectiveness on precleaned hard nonporous surfaces against the following microorganisms:
VIRUCIDAL - Kills Human Immunodeficiency Virus Type 1 (HIV-1; a retrovirus that causes "AIDS"), Herpes Simplex Virus Type 1 and Herpes Simplex Virus Type 2, Influenza A2/Hong Kong Virus, Adenovirus Type 5, Vaccinia Virus, Infectious Canine Hepatitis Virus, Canine Distemper Virus, Feline Pneumonitis Virus, and Avian Influenza A Virus (H5N1).

BACTERICIDAL – Kills *Escherichia coli*, *Pseudomonas aeruginosa*, *Salmonella enterica*, *Salmonella schottmuelleri* (paratyphoid B), *Shigella dysenteriae*, *Streptococcus pyogenes*, *Staphylococcus aureus*, and Methicillin-resistant *Staphylococcus aureus* (MRSA).

TUBERCULOCIDAL - Kills *Mycobacterium tuberculosis bovis* BCG (Tubercle bacilli).

FUNGICIDAL - Kills *Trichophyton mentagrophytes* ("Athlete's Foot" fungi) in bathrooms, shower areas, and locker rooms.

CONTROLS MOLD/MILDEW - Completely inhibits the growth of *Aspergillus niger* and *Penicillium glaucum* fungi on porous surfaces.

SANITIZES - Controls *Staphylococcus aureus* and *Klebsiella pneumoniae* on porous fabric and leather surfaces, such as on shoes, athletic mats, athletic shoes and other athletic equipment.

DEODORIZES - Pleasant fragrance quickly suppresses existing unpleasant odors from many sources.

APPLICATIONS

For use in industrial, institutional, commercial, medical, and residential facilities including hospitals, nursing homes, medical and dental offices and clinics; equipment and vehicles including ambulances and taxis; veterinary offices and animal area; schools, libraries, laboratories, hotels and motels; restaurants and cafeterias; food storage, processing packaging, handling and service establishments and equipment; offices; stores; factories and manufacturing plants; and apartment buildings and homes.

B SANITIZED can be used on most glass, glazed porcelain, glazed ceramic, enameled, painted, plastic (such as ABS, acrylic, latex rubber, phenolic resin, polyamide, polycarbonate, polyester, polyethylene, polyolefin, polypropylene, polystyrene, polytetrafluorethylene, polyurethane, and vinyl), rubber, metal, sealed leather, finished wood, sealed grout, and sealed concrete, and similar nonporous surfaces.

DIRECTIONS FOR USE

Shake container well before each use and hold it upright while spraying. For use on precleaned, hard nonporous surfaces; not for use on humans or animals. Remove food or related products from the area being treated. Do not use on waxed/polished surfaces, water-based "latex" paint, shellac, cellulose (such as rayon) or other alcohol-sensitive materials.

To disinfect hard, non-porous surfaces: Preclean surfaces as directed above. Hold container upright 6-8" from the surface and spray to thoroughly wet. Treated surfaces must remain wet for 10 minutes. Allow to air dry. Rinse all surfaces that come in contact with food such as counters, appliances, tables with potable water. Do not use on utensils, glassware, and dishes.

To Clean/Deodorize: Hold container upright about 6-8" from surface. Spray surface and allow to air dry.

To Control Mold/Mildew and Sanitize Porous Surfaces: Inhibits the growth of *Aspergillus niger* and *Penicillium glaucum* fungi and controls *Staphylococcus aureus* and *Klebsiella pneumoniae* on porous surfaces such as fabric and leather surfaces. Hold container upright about 6-8" from the surface. Spray to thoroughly wet. Treated surfaces must remain wet for 5 minutes. Allow surfaces to air dry. For mold/mildew control, repeat application every 7 days or more frequently if new growth appears.

To Kill HIV (Human Immunodeficiency virus Type 1; AIDS virus) on Precleaned Surfaces/Objects: If the surface is contaminated with blood/body fluids barrier protection items such as disposable latex gloves, gowns, masks, and eye coverings must be worn when handling soiled items. Blood/body fluids must be thoroughly cleaned from surfaces/objects before application of this product as a disinfectant. Hold container upright 6-8" from the surface and spray to thoroughly wet. Treated surfaces must remain wet for 10 minutes. Blood/body fluids and other materials removed from or used to clean surfaces/objects must be autoclaved and disposed of according to federal, state and local regulations for infectious waste disposal.

Directions for Fogging Rooms greater than 5 FT x 5 FT: All surfaces must be cleaned and disinfected in accordance with label directions prior to fogging. Fogging is an adjunct or supplement to normal cleaning and disinfection procedures and practices. Do not use more than one fogger per average size room. Do not use in small, enclosed spaces such as closets, cabinets or under counters or tables. Do not use in a room 5 ft. x 5 ft. or smaller.

Turn off ALL ignition sources such as pilot lights (shut off gas valves), or open flames or running electrical appliances that cycle off and on (i.e. refrigerators, thermostats, etc.). Call your gas utility or management company if you need assistance with your pilot lights. Remove exposed food, utensils, and dishes. Cover immobile food handling equipment. Open cabinets and doors to area to be treated. Shut off fans and air conditioners. Seal doors and windows.

Point valve opening away from face and eyes when releasing. Use one unit for every 6,000 cubic ft. of unobstructed area. Do not remain in the area during treatment. Ventilate thoroughly before re-entry. Do not use this unit in a cabinet or under a counter or table. Do not use this in an area less than 100 cubic ft. Do not use more than one unit per average size room. Point valve opening away from face and eyes when releasing. TO OPERATE VALVE: Place several layers of newspaper or pad on stand or table in the center of the room. To lock the fogger valve in the open position for automatic discharge, press the valve button completely down hooking it in the catch. Then place fogger on the stand or table. Leave room or building and keep room/building closed for two hours before airing out. Open all doors and windows and allow to air for five hours.
